Professional Summary

Frontend Engineer with **6+ years** of experience building scalable **web** and **mobile** applications using React, Next.js, React Native, Flutter, TypeScript, and TailwindCSS.

Specialized in fintech and **Web3** products, with hands-on experience developing **wallet-integrated** applications, **NFT** marketplaces, **tokenized** asset platforms, **RWA**, staking systems, lending products, **blockchain** dashboards, and transaction-driven user experiences.

Proven track record of delivering production-grade applications across mobility, **fintech**, blockchain infrastructure, and digital asset ecosystems, with a strong focus on **performance**, reusable UI systems, **scalability**, and user-centric design.

Tech Stack

Languages: JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3

Frontend: React.js, Next.js, TailwindCSS, ShadCN UI

Mobile: React Native, Flutter

State & Data: Zustand, River Pod, Provider

Web3: Ethers.js, Wagmi, WalletConnect, RainbowKit, **MetaMask**, Coinbase Wallet, **NFTs**, Tokenized Assets, Marketplace Systems, **Staking**, Wallet Authentication, Transaction Flows, **RWA**

Backend & Cloud: Firebase, REST APIs, Cloud Functions, Node.js (basic)

Tools: CI/CD, Git, GitHub, GitLab, **Vercel**, Postman, Jira, **Circle-CI**

Design: Figma, Storybook, Design Systems

Other: Vercel Deployment, App Store & Play Store Publishing, Agile/Scrum

Work Experience

Frontend Engineer

TADA Mobility | Aug 2025 – Present | Bengaluru

- Contributing to **MUSUBI**, a Japanese **fintech** and **Web3** platform, developing lending, **tokenized** asset, **NFT**, wallet-integrated transaction, and **marketplace** experiences
 - Working on **AR Service**, building invoice management, **marketplace**, fractional purchase, **redemption**, and **NFT**-backed asset workflows
 - Building and maintaining production-grade **web** and **mobile** applications using React, Next.js, TypeScript, and React Native
 - Contributing to consumer-facing **mobility** platforms serving users across Singapore, USA, and Cambodia, delivering scalable and responsive user experiences
 - Developing reusable UI components and shared frontend architecture using **TailwindCSS** and **Zustand** to improve consistency and maintainability
 - Enhancing core product workflows across **TADA Rider** and **TADA Driver**, including booking, ride management, payments, and user engagement features
 - Supporting **TADA Mini** and **DePIN**-related initiatives by developing modular and scalable frontend solutions
 - Collaborating with product, design, backend, and QA teams to deliver high-quality features in agile development environments
-

Frontend & Flutter Developer

Zeeve | June 2021 – July 2025 | Bengaluru (Remote)

- Built **Web3** dashboards, **validator management** platforms, **node sale platforms**, and blockchain **explorers** using React, Next.js, TypeScript, GraphQL, and TailwindCSS
 - Integrated MetaMask, Coinbase Wallet, RainbowKit, and Ethers.js to enable wallet connectivity, staking, **governance**, and transaction workflows
 - Developed and maintained **Flutter** mobile applications for **blockchain** infrastructure monitoring, wallet management, and validator operations
 - Created reusable UI components and internal design systems using **Storybook**, improving development efficiency and UI consistency across products
 - Refactored legacy applications to enhance maintainability, performance, accessibility, and overall user experience
 - Collaborated with **product**, **design**, **backend**, and **DevOps** teams to deliver scalable, production-ready features in agile environments
-

Mobile Developer Intern

Vidyutthantra OPC Pvt Ltd | 2020 – 2021 | Bengaluru

- Built cross-platform apps using Flutter
 - Implemented reusable components and improved UI responsiveness
 - Worked with Firebase for backend integration and analytics
-

Selected Projects

- **AR Service Platform** - Built marketplace, invoice management, fractional asset purchases, redemption workflows, and NFT-based ownership experiences.
 - **Musubi** - Developed fintech and Web3 features including lending, tokenized asset management, NFT interactions, wallet-based transactions, and marketplace functionality for Japanese users.
 - **TADA Rider & Driver Apps** - Built and enhanced production-grade ride-hailing experiences using React Native, supporting scalable rider and driver workflows.
 - **Node Sale & Validator Dashboards** - Developed scalable Web3 dashboards and validator participation flows using React, Next.js, and wallet integrations.
 - **Zeeve Mobile App** - Built a Flutter-based mobile app for blockchain infrastructure visibility and validator monitoring.
 - **Multi-Chain Wallet App** - Implemented wallet-related experiences including token management, staking, and governance modules.
-

Product Domains & Platform Exposure

- **Fintech / Web3:** Lending-related interfaces, wallet-based workflows, **RWA**, token and NFT-related user journeys
 - **Mobility / Ride-Hailing:** Rider and driver applications, booking flows, ride management, payments, and consumer product experiences
 - **Blockchain Infrastructure:** Validator dashboards, staking flows, blockchain explorers, node sale platforms, and infrastructure visibility tools
 - **Mobile Products:** Cross-platform applications built using **Flutter** and **React Native** for production use cases
-

Education

B.Sc - Electronics, Mathematics & Computer Science

Seshadripuram First Grade College, Bengaluru University

2016 – 2019
