Professional Summary

Frontend Engineer with **6+ years** of experience building scalable web and mobile applications using **React**, **Next.js**, **React Native**, **Flutter**, **TailwindCSS**, and **Zustand**.

Experienced in shipping production-grade products across **mobility**, **fintech**, and **Web3**, with strong focus on **performance**, **reusable UI** systems, **responsive** design, and clean **user experience**.

Tech Stack

Languages: JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3

Frontend: React.js, Next.js, TailwindCSS, ShadCN UI

Mobile: React Native, Flutter

State & Data: Zustand, River Pod, Provider

Web3: Ethers.js, Wallet Integrations, NFTs, Token Systems

Backend & Cloud: Firebase, REST APIs, Cloud Functions, Node.js (basic)

Tools: CI/CD, Git, GitHub, GitLab, **Vercel**, Postman, Jira, **Circle-CI**

Design: Figma, Storybook, Design Systems

Other: **Vercel Deployment**, App Store & Play Store Publishing, Agile/Scrum

Work Experience

Frontend Engineer

TADA Mobility | Aug 2025 – Present | Bengaluru

- Building and maintaining **production-grade web and mobile applications** using React, Next.js, and React Native
- Contributing to **consumer-facing mobility platforms** serving users across **Singapore**, **USA**, and **Cambodia**
- Developing shared and reusable UI patterns using **TailwindCSS** and **Zustand** for consistent web and mobile experiences
- Working on key product workflows across **TADA Rider** and **TADA Driver**, including booking, ride management, payments, and user interaction flows
- Contributing to frontend modules for **Musubi**, a Japanese **fintech** / **Web3** product involving **lending**, token-related experiences, and **NFT-oriented** interfaces
- Supporting modular frontend development for lightweight and infrastructure-related product initiatives such as **TADA Mini** and **DePIN**-focused interfaces
- Collaborating with product, **backend**, and **design teams** to deliver scalable, high-quality frontend features

Frontend & Flutter Developer

Zeeve | June 2021 – July 2025 | Bengaluru (Remote)

- Built **Web3 dashboards**, **validator platforms**, and **node sale interfaces** using React, Next.js, TypeScript, **APIs/GraphQL** and TailwindCSS
- Integrated wallets including **MetaMask**, **Coinbase Wallet**, **RainbowKit**, and **Ethers.js** for staking and transaction flows
- Developed and shipped Flutter mobile applications for **blockchain infrastructure** and monitoring use cases
- Created reusable UI components and internal systems using **Storybook**, improving design consistency and development speed

- Refactored legacy modules to improve **maintainability**, **usability**, and **frontend performance**
 - Collaborated across teams to deliver **production-ready** features on time
-

Mobile Developer Intern

Vidyutthantra OPC Pvt Ltd | 2020 – 2021 | Bengaluru

- Built cross-platform apps using Flutter
 - Implemented reusable components and improved UI responsiveness
 - Worked with Firebase for backend integration and analytics
-

Selected Projects

- **TADA Rider & Driver Apps** - Built and enhanced production-grade ride-hailing experiences using React Native, supporting scalable rider and driver workflows.
 - **Musubi** - Contributed to a Japanese fintech / Web3 platform involving lending, token-related experiences, and NFT-enabled interfaces.
 - **Node Sale & Validator Dashboards** - Developed scalable Web3 dashboards and validator participation flows using React, Next.js, and wallet integrations.
 - **Zeeve Mobile App** - Built a Flutter-based mobile app for blockchain infrastructure visibility and validator monitoring.
 - **Multi-Chain Wallet App** - Implemented wallet-related experiences including token management, staking, and governance modules.
-

Product Domains & Platform Exposure

- **Mobility / Ride-Hailing:** Rider and driver applications, booking flows, ride management, payments, and consumer product experiences
 - **Fintech / Web3:** Lending-related interfaces, wallet-based workflows, token and NFT-related user journeys
 - **Blockchain Infrastructure:** Validator dashboards, staking flows, blockchain explorers, node sale platforms, and infrastructure visibility tools
 - **Mobile Products:** Cross-platform applications built using **Flutter** and **React Native** for production use cases
-

Education

B.Sc - Electronics, Mathematics & Computer Science

Seshadripuram First Grade College, Bengaluru University

2016 – 2019
